

## Health Care Epidemiologist Vancouver, BC

**Providence Health Care** (PHC) invites you to join an organization that is guided by the principle '**How you want to be treated**'. Share in our passion to achieve excellence through learning and continuous improvement. Thrive in an environment that prides itself on diversity, integrity and respect. Providence Health Care is known for innovation and leadership in cardiac, renal, mental health, urban health, elder care, rehabilitation and HIV/AIDS.

Reporting to the Medical Director, Infection Prevention and Control (IPAC), and to the IPAC Team Leader for administrative issues, the Health Care Epidemiologist is an integral member of the IPAC Team and is responsible for leading the establishment, maintenance, and analysis of Providence Health Care's infection surveillance systems. Your role will involve investigation of hospital-associated outbreaks, evaluation of infection control interventions, and translation of surveillance data into institutional policy.

Your expert background is complemented by a Master's degree or PhD in epidemiology, public health or related health profession plus five years' recent related experience in health care or public health or an equivalent combination of education and experience.
